

Care and Maintenance

Self-Inking Pallet Stamp

- Do not over-saturate the stamp pad with ink
- Store either the entire stamp or remove the stamp pad and store in a zip lock bag when not in use. This will help keep the ink pad from drying out and will help to extend its life.
- When cleaning the rubber die, use only a mild cleaner, such as dish soap with warm water, or a die cleaner available thru Excelsior Marking. Use this along with a soft bristle tooth brush to clean the die and machine. **Never** use benzene, gasoline, paint thinner, or harsh cleaning solvents of any kind – this will ruin the rubber die and the machine!
- **Do Not Use Stencil Ink** with your self-inking stamp, it will ruin the rubber die! You need to use an ink that is formulated for stamping.
- It is not required but it is recommended that you use the ink supplied by Excelsior Marking to achieve the best results and life from your self-inking stamp.
