Care and Maintenance of your new self-inking SpeedRoller

Do not over-saturate the felt rollers with ink.

When cleaning the rubber die, use ONLY a mild cleaner such as dish soap with warm water, or a die cleaner available thru Excelsior Marking.

NEVER use Benzene, Gasoline, Paint Thinner, or harsh cleaning solvents of any kind- this will ruin the rubber die.

We recommend that you use the ink supplied by Excelsior Marking to achieve the best results and life from your self-inking SpeedRoller.

DO NOT USE Stencil Ink of any kind on this roller.

When not in use, store your roller in a zip lock bag, this prevents the felt rollers from drying out.

Please contact Customer service at Excelsior Marking with any questions or concerns .
